

Cargo trailer CM200-R

(EC0201TI)

Extremely compact trailer with a small own weight on a bolted and riveted frame. At the same time, no compromises have been made on strength, durability or functionality. Ideal for household transports (such as furniture, building material, plants and garden waste, etc.).

The trailer is made of hot-dip galvanized sheet metal suitable for Nordic conditions. Waterproof hubs provide the bearings with a longer life. The cargo box is equipped with strap loops on the inside and hooks on the outside to securely fasten the load. The tilting cargo box allows the trailer to be used for loading and unloading lighter vehicles (lawn tractor, ATV, etc.). Thanks to the folding drawbar system, this trailer is the best helper for tight conditions. The folding drawbar system also allows the trailer to be stored vertically.

Upgrade your trailer with accessories for the best user experience.
