

BS750-R boat trailer

(EC0506TI)

The single-axle boat trailer on a hot-dip galvanized welded frame is user-friendly and durable. This trailer is designed for everyday use as well as for those who only need a trailer once or twice a year. Fits all the most common boat models.

NB! When choosing a trailer, keep in mind the dimensions and weight of your boat, including engine, fuel and accessories.

Waterproof hubs ensure a longer life for the bearings. The frame of the trailer is equipped with strong fastening eyes to secure the boat. The trailer is equipped with an adjustable winch jack, which allows you to adjust the winch jack according to the dimensions and shape of the boat. A winch with a brake ensures convenient and safe use. Adjustable side supports help direct the boat onto the trailer. A tilting mechanism with a long frame and additional rollers allows the boat to be launched smoothly and winched. The taillights are attached to the trailer frame. Thanks to this, the trailer can be used without moving the lights.

Upgrade your trailer with accessories for the best user experience.
