

BP3500-DRB boat trailer with flip-up LED tail lights

(EC0518TI)

The double-axle boat trailer with brakes on a hot-dip galvanized welded frame is user-friendly and durable. This trailer is designed for everyday use as well as for those who only need a trailer once or twice a year. Fits all the most common boat models. Multiroll System saves your boat and your time.

NB! When choosing a trailer, keep in mind the dimensions and weight of your boat, including engine, fuel and accessories.

The A-shaped frame and the maximum low center of gravity of the trailer increase stability and safety while driving. Waterproof hubs ensure a longer life for the bearings. Metal fenders make the trailer more comfortable to use. The frame of the truss-reinforced trailer is equipped with strong fastening eyes to secure the boat. The trailer is equipped with an adjustable winch jack, which allows you to adjust the winch jack according to the dimensions and shape of the boat. For more stable transport of the boat, the trailer winch is equipped with double nose supports. A winch with a brake ensures convenient and safe use. Automatically set side supports help to direct the boat to the trailer more stably and straightly. The trailer is equipped with waterproof flip-up LED taillights and a waterproof wiring system.

Upgrade your trailer with accessories for the best user experience.
