

# BE600-L boat trailer with slide skids

(EC0565TI)

The single-axle boat trailer on a hot-dip galvanized welded frame is user-friendly and durable. This trailer is designed for everyday use as well as for those who only need a trailer once or twice a year. Suitable for all the most common flat bottom boat models and inflatable boats.

**NB!** When choosing a trailer, keep in mind the dimensions and weight of your boat, including engine, fuel and accessories.

Leaf suspension with shock absorbers reduces the effect of potholes on the trailer and improves driving characteristics. Waterproof hubs ensure a longer life for the bearings. Metal fenders and step boards make the trailer more comfortable to use. The frame of the trailer is equipped with strong fastening eyes to secure the boat. The trailer is equipped with an adjustable winch jack, which allows you to adjust the winch jack according to the dimensions and shape of the boat. A winch with a brake ensures convenient and safe use. The rails support the boat evenly along the full length of the rail. The taillights are attached to the fender of the trailer. Thanks to this, the trailer can be used without moving the lights.

Upgrade your trailer with accessories for the best user experience.
