

BX750-LW PRO multiroller boat trailer

(EC0587TI)

TIKI's new generation boat trailer combines innovative design and practicality, offering a safe and convenient transport solution for various boat types. It is designed with even the most demanding user in mind. The BX series has been developed in collaboration with boat manufacturers and users. The hot-dip galvanized welded frame single-axle trailer is designed for everyday use as well as for those who need a trailer only once or twice a year.

NB! When choosing a trailer, keep in mind the dimensions and weight of your boat, including engine, fuel and accessories.

The PRO series has:

- 09m wide frame;
- Waterproof LED lights;
- Reinforced coupling head.

The wider trailer provides the best driving experience and better access to the boat on the trailer. The frame with extended side beams increases stability and safety when driving. Leaf suspension with shock absorbers relieves the effect of impact holes on the trailer and improves driving performance. **The adjustable length drawbar allows the trailer to be adjusted according to the length of the boat and the centre of gravity.** On the winch tower, it is possible to adjust the height of the winch and the nose support, as well as the angle relative to the ground. A winch with a brake ensures comfortable and safe operation. For safer and more convenient movement of the boat without a towing vehicle, the support wheel is supported from two points. Waterproof hubs ensure a longer life for the bearings. The trailer frame is equipped with large strong mounting loops to securely fasten the boat. The self-regulating side rollers adapt to the shape of the bottom of the boat and help to load and unload the boat more smoothly. Thanks to the multi-rollers, the boat is better supported, the load is more evenly distributed, and the boat thus remains more stable on the trailer. Metal step-on fenders and step boards provide better access to the boat on the trailer. The taillights are attached to the mudguard of the trailer. Thanks to this, the trailer can be operated without moving the lights.

Upgrade your trailer with accessories for the best user experience.

Tehnilised andmed

Max paadi pikkus (m):	5.3
Raam:	Welded
Täismass (kg):	750
Tühimass (kg):	236
Kandevõime (kg):	514
Haagise pikkus (m):	5.35
Haagise laius (m):	2.09
Sild:	leaf spring
Pidurid:	NO
Rehvid:	155 R13 84N 4 x 100 M+S

Standardvarustus

- ✓ Tugevdatud kinnitusega tugiratas
- ✓ Tugev kuumtsingitud keevisraam
- ✓ Vastupidav keevissild 4-leheliste vedrudega
- ✓ Reguleeritava pikkusega tiisel
- ✓ 2 kiilurulli
- ✓ Reguleeritav vintsipukk koos vintsi ja ninatoega
- ✓ Piduriga vints
- ✓ Multirullid kallutusmehhanismiga
- ✓ Multirull süsteem 16 rullikuga
- ✓ Veekindlad rummud
- ✓ Tugevad kinnitusaasad
