

Furgoonhaagis CV350-L Sandwich, küljeuksega

(EC0389T128)

The Tiki van trailer is made for you when you need to protect your goods from the weather or prying eyes. The enclosed van helps keep your goods clean. The outside of the trailer can be used as a promotional surface for your products or services. The side panels are made of double-laminated XPS insulated sandwich panels. The roof and front wall form a weatherproof unit with extremely low wind resistance. The leaf suspension with shock absorbers ensures a smooth ride even on rough roads. The water- and slip-resistant coated base plywood is easy to clean. The full-weld solution on the rear panel ensures a robust construction and long service life.

The tailgate can be opened in two directions - sideways and downwards.

This allows the tailgate to be used as a main access road. By opening the hatch to the side, it is convenient to load the goods with a forklift. The rear hatch is equipped with a special anti-slip coating and is also fitted with gas dampers to ensure a smooth opening downwards. The load capacity of the rear hatch is 300kg. In addition, the hatch has a practical fixation device which ensures that the hatch, when opened to the side, remains in place even in windy conditions. The side hatch makes it easy to assist loading.
