

Platform trailer FX460-TRB 13"

(EC0242TI)

FX460-TRB – the flagship of Tiki platform trailers!

The most anticipated NEW PRODUCT of 2026

FX460-TRB is a versatile flat-floor platform trailer that combines robust construction with an extensive range of accessories. The drop-down and removable **hot-dip galvanised and painted sheet metal sideboards*** allow the trailer to be used as a platform or for quick and convenient loading from any side using a forklift.

The hot-dip galvanised full-welded frame is designed to withstand heavy loads and intensive use. The combined tube and sheet metal construction ensures a high-quality and durable frame, offering maximum rigidity, lightness and stability even in the most demanding conditions.

For the safe loading of various vehicles or other mobile machinery, the trailer is equipped with **strong perforated loading ramps*** that can be conveniently stored and locked in pockets located under the platform. The loading angle of the trailer can be adjusted by using **the hydraulic tilting system***. This makes loading low-clearance vehicles smoother and safer.

A rear ramp with tension springs* ensures quick and easy loading of equipment of various widths and is **also suitable for loading three-wheeled machinery**.

Lightweight sheet metal sideboards* are easy to handle and are equipped with user-friendly latches, making opening and closing them quick and convenient. The wheels of the trailer are positioned under the platform to provide the biggest possible loading area, and the minimised loading height makes loading convenient while ensuring a lower centre of gravity.

FX460-TRB is available in various configurations – with 10" or 13" wheels and with **two or three axles**.

Waterproof hubs ensure a longer service life for the bearings.

For secure cargo fastening, the platform is **provided with numerous lashing holes** and strap hooks located on the outer edge. With its flat floor and middle part covered with plywood, this trailer is perfect for transporting a wide range of different cargo.

To get the most out of your trailer, you can upgrade it with our range of optional extras.
